

Options for upgrading *dicomPACS® DX-R*

dicomPACS® DX-R may not only be used as a software for the acquisition and processing of X-ray images, but can also be upgraded to a MiniPACS or even to an Enterprise Multi Modality PACS. Over 5.000 installed workstations in more than 35 countries (as of 1 November 2008) prove that our customers are satisfied.

A single workstation system with installed *dicomPACS® DX-R* software can be upgraded with the following options (extract):

Further optional viewer functions:

- May be installed on **Apple MAC and Linux** systems
- Generation of full leg/full spine images
(Image stitching)
- Preparation of diagnostic reports with integrated images in MS Word
- Connection of several diagnostic monitors
- Capturing of additional patient and examination data with their freely configurable **statistical analysis**
- Working with **digital prosthesis templates for surgery planning** and documentation - Prosthesis templates can be selected from a set and inserted into the image as annotations
- Additional radiological functions such as Maximum Intensity Projection (**MIP**), Multiplanar Reconstruction (**MPR**), hanging protocols and mammography tools
- Fast and easy preparation of **equine pre-purchase examinations** with automatically inserted X-ray images (only for Germany)
- And much more...
