Veterinary medicine

OEM

Conventional X-ray equipment and accessories

Conventional X-ray Equipment
 IX-ray Systems for the Future

...the latest technology for conventional X-ray systems

Versions

- portable X-ray units by GIERTH X-ray international
- mobile stands and cassette holders
- X-ray tables and wall arms

Digital X-ray systems incl. **dicomPACS® DX-R** acquisition software

Medici DR Systems vet
 With **DX-R** Acquisition Software
 IDR Retrofit Systems for the Future

DR retrofits

...expanding sets for existing X-ray systems

Medici Versions

- Medici DR 1417vet**
1 panel 14"x17" (mobile) incl. PC and **DX-R** software
- Medici DR 1717vet**
1 panel 17"x17" for fixed installation incl. PC and **DX-R** software
- Medici DR 1216vet**
1 panel 12"x16" incl. PC and **DX-R** software

Leonardo DR Systems
 With **DX-R** Acquisition Software
 IPortable X-ray Systems for the Future

DR suitcase solutions

...suitcases for mobile and portable X-ray

Leonardo Versions

- Leonardo DR 2520+**
the portable DR system; sensor 8" x 10" (25 x 20 cm) for equine pre-purchase examination incl. **DX-R** software
- Leonardo DR 1210vet**
the portable DR solution; sensor 10" x 12" (27 x 33 cm) for equine pre-purchase examination incl. **DX-R** software
- Leonardo DR 1417vet**
the portable DR solution; sensor 14" x 17" (35 x 43 cm) for all purposes incl. **DX-R** software

Amadeo DR Systems vet
 With **DX-R** Acquisition Software
 IX-ray Systems for the Future

Complete DR systems

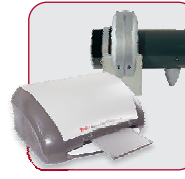

...complete X-ray systems incl. stand, table, generator, flat panel etc.

Amadeo Versions

- Amadeo DR 1417vet**
complete table with generator, PC and **DX-R** software
- Amadeo DR 1717vet**
complete table with generator, PC and **DX-R** software
- Amadeo DR 4030vet**
complete table with generator, PC and **DX-R** software

Divario CR Systems vet
 With **DX-R** Acquisition Software
 ICR Systems for the Future

CR solutions

...CR systems for digital X-ray with cassettes

Divario Versions

- Divario CR 360vet**
incl. **DX-R** software
Basic device: Kodak PoC 360
- Divario CR 35vet**
incl. **DX-R** software
Basic device: Dürr

Image management (PACS)

IdicomPACS® vet
 IDigital Image Processing
 IIn Veterinary Medicine

...covers acquisition, processing, diagnosis, transfer and archiving of image material; all exposures and all types of documents will be filed in digital patient files.

Modules and Solutions

- Web Server
- Prosthesis Documentation Module
- Patient CD
- Equine pre-purchase examination
- Statistics Module
- Video Module
- Processing of CT and MRT series
- and many other functionalities

X-ray acquisition software

dicomPACS® DX-R
 X-ray Acquisition Software

[only for OEMs]

dicomPACS® DX-R is a professional acquisition software for X-ray images of flat panel systems (DR) and CR devices (readers) of any manufacturer. In addition, the software can control X-ray generators and X-ray systems by various manufacturers. It ensures an organised and smooth workflow. A simple and user-friendly operating interface together with touch screen and mouse control completes the system.

dicomPACS® DX-R forms the core of a digital X-ray system whether it is a retrofit solution for the digitalisation of an already installed X-ray system, a completely new system with generator control or a transportable suitcase solution for a mobile X-ray generator.
