Portable DR solution **Leonardo DR mini**
for Pferdeklinik Bieberstein

Horse clinic Bieberstein, headed by Dr. Stefan von Bieberstein, has been caring for sick horses for 17 years. The clinic in Cham provides round-the-clock medical care for its patients, 18 of which can be housed simultaneously.

The clinic team which has now expanded to six veterinarians, eight veterinary assistants and four other staff members, offers a large range of services in various fields such as surgery, orthopaedics and dentistry.

Dr. Stefan von Bieberstein, head of the clinic:
"The **Leonardo DR mini** system is the favourite amongst all our staff members since it consistently provides excellent quality images."

A large part of daily diagnostics involves X-ray imaging. Looking for a digital X-ray solution, Dr. Stefan von Bieberstein soon found what he needed in the **Leonardo DR mini** X-ray suitcase solution by OR Technology.

"The portable solution provides everything my colleagues and I need for a faultless and fast workflow. The wireless detector has done away with irritating cables, the suitcase is light and practical and consists of a minimum of parts.

OR Technology's **dicomPACS[®]vet** image management software assists us in daily diagnoses, even when taking difficult images, for instance of the back or the neck. In addition, we regularly use the **dicomPACS[®]vet** report module for pre-purchase horse examinations. Apart from the uncomplicated documentation of diagnostic reports, the module allows us to explain the result of the pre-purchase examination to the customer immediately and hand him or her a patient CD with just one mouse click.

The **Leonardo DR mini** system is a favourite among the staff and consistently provides excellent image quality. Thanks to its really very innovative user guide there are never any delays in daily use.

We use the system on a daily basis, not only for event support but also in the field."

Wireless radiography with the incredibly light and compact X-ray suitcase system for the mobile vet

Small, lightweight and functional – these are the main characteristics of the sleek and well-designed **Leonardo DR mini**. This wireless and compact suitcase solution is at 9.5 kg one of the most lightweight X-ray suitcases worldwide. It supports the vet in both mobile and stationary radiography. The **Leonardo DR mini** suitcase can be used in mobile vet practices, equine clinics, university facilities and veterinary hospitals.

The sturdy and easily manageable suitcase with its impact and stain resistant synthetic coating is also easy to carry with the additional shoulder strap. A built in notebook with a high resolution monitor and our acquisition and diagnostic software guarantees an outstanding image display.

The integrated wireless flat panel detector is light and easy to handle at 1.5 kg. Automatic image alignment together with many other features allow for excellent image quality and accurate operation.
