**VersariX** - the portable mounting system for X-ray detectors

**VersariX** is THE portable flat panel detector mounting system for X-ray examinations conducted in unusual places such as private residences, old-age homes, medical tents or ships etc. In confined spaces like these, installation of a mobile stand to support the X-ray detector is often problematic. In addition, transporting a fold-up mobile stand is often inconvenient due to its weight and space requirements.

This is where **VersariX** comes in. Weighing only some 400 grams, it can be attached anywhere, like on room or wardrobe doors, walls, trees etc. The sturdy hook used to suspend the X-ray flat panel detector allows virtually stepless height adjustment. X-ray images ranging from the cranium to the thorax to the foot can be taken professionally and effortlessly.

**VersariX** is OR Technology’s own design and 100% German manufactured.
Benefits

**Ideal:** very lightweight at only 400g, fits in every pocket [dimensions for transport: 20 x 15 x 8 cm]

**Flexible:** very versatile and suitable for all X-ray images in standing or sitting position - with the almost infinitely height-adjustable detector, even special images in confined spaces can be taken easily and professionally

**Hygienic:** Easy to clean and resistant to desinfectants

**Versatile:** Wide range of applications for homecare, NGOs and medical facilities with confined spaces [medical tents, on-board hospital, etc.].

**Made in Germany:** designed by OR Technology – all components produced in Germany

**Sophisticated:** 3 mounting options are available for secure attachment to doors, hooks, nails, branches, etc.

Detailed information can be found at [www.or-technology.com](http://www.or-technology.com)
Universal attachment options for flexible use

VersariX is suitable for all X-ray flat panel detectors with or without a protective cover and can be attached to any door by means of special loops made of sturdy polypropylene belt. The powder-coated mounting system allows the unit to be safely suspended from hooks, screws, branches or other suitable options that are sufficiently sturdy. The height of the X-ray detector is easy to adjust, including when the detector is already suspended.

1. Loop mounting bracket for doors (no constraint - the door can be closed during the X-ray process)

2. Wall mounting with fixed screws, hooks etc.

3. Mounting on cabinet doors etc. with provided hook

Materials and weight

- special strap made of Kevlar-reinforced neoprene, powder-coated stainless steel/aluminium, sturdy polypropylene belt, ca. 400 g

Height-adjustable detector

- min. 150 cm (dimensions of toothed belt)
- the sturdy hook made of powder-coated stainless steel for suspending the X-ray flat panel detector, allows almost stepless height adjustments
- X-rays ranging from the cranium to the thorax to the foot can be adjusted effortlessly

Tensile load of hook

to 10 kg

Operating temperature

between -10 and +45° C

Dimensions for carrying in a transport bag

ca. 20 x 15 x 8 cm

Dimensions of packaging

ca. 22 x 16 x 10 cm

For delivery to your place of operation, you can choose between a sturdy packaging box and a space-saving cloth bag (included).

Warranty

2 years
